HOUSE VOTE DATA & THE CONGRESS.GOV API

Congress.gov API changelog

New beta House Roll Call Votes API endpoints are targeted for release.

The House Roll Call Votes endpoints will consist of a list level, an item level, and a member votes level for 2003-present (beginning with the 108th Congress). The list level is filterable by congress and session.

Detailed information about each roll call vote will be available at the item level. Detailed information about member votes will be available at the member vote level.

The endpoints, once development work is completed, are planned to be:

- api.congress.gov/v3/house-vote
- api.congress.gov/v3/house-vote/{congress}
- api.congress.gov/v3/house-vote/{congress}/{session}
- api.congress.gov/v3/house-vote/{congress}/{session}{rollCallVoteNumber}
- api.congress.gov/v3/house-vote/{congress}/{session}/{rollCallVoteNumber}/members
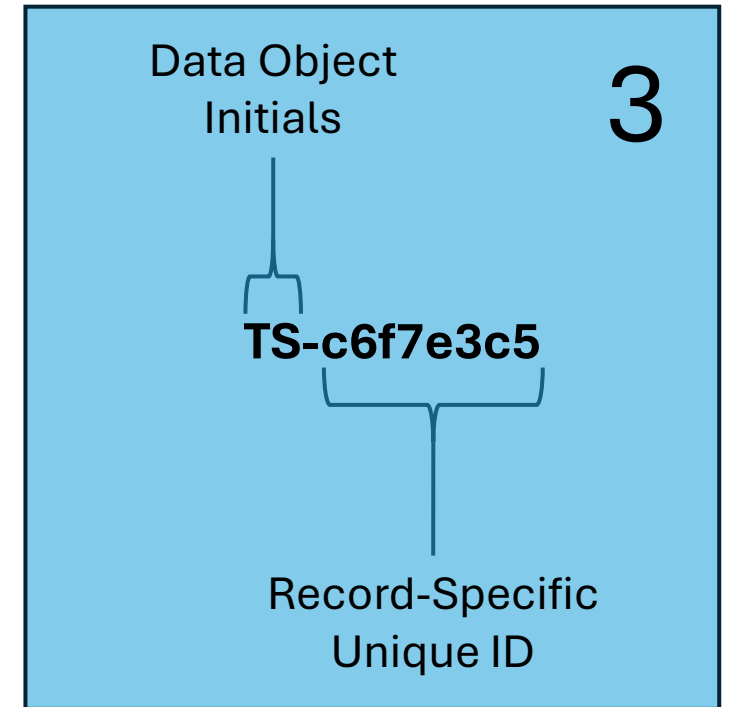

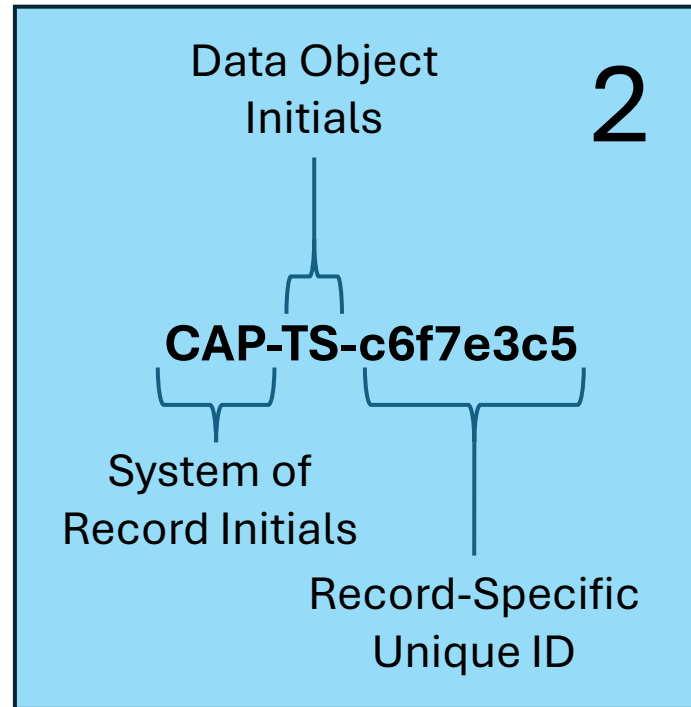

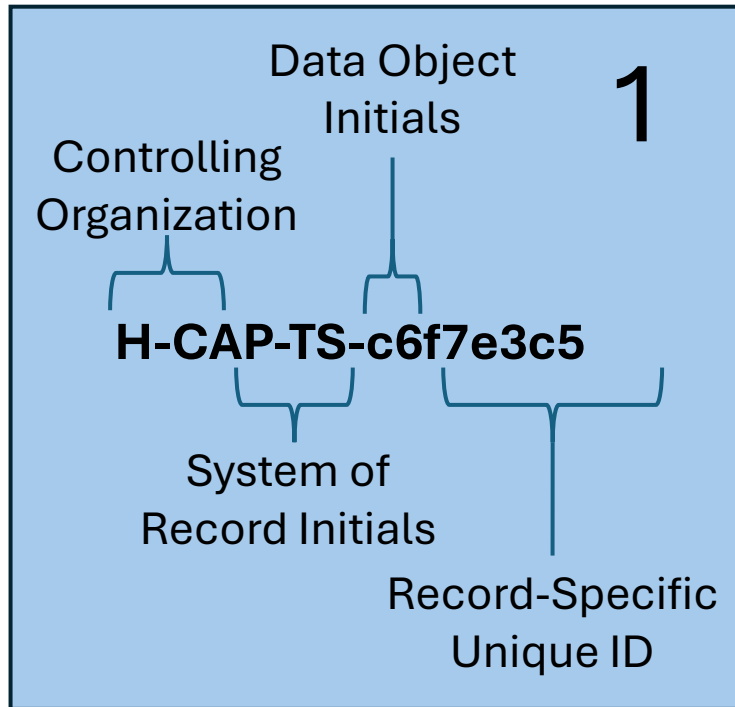

Requested input

Business need:

unique identifier for each individual committee vote

- Should look different than a bioGuide ID
- Should be identifiable as House identifier
- Should not be as long as some of the identifiers and file names on docs.house.gov
- Needs to be throw-away in case Committee staff need to delete before publishing

What is EEAA?

- A report showing all Expired and Expiring Authorizations of Appropriations (EEAA)
  - How Congress is supposed to work:
    - Authorizers create an agency/program/authority and say "this is eligible to receive $XX in Appropriations."
    - Appropriators may direct discretionary funds to that purpose
  - How it actually works:
    - Appropriators direct discretionary funds to whatever they like (including expired programs); Authorizers get annoyed;
    - The Supreme Court ruled that Appropriation is Authorization as Congress passes the bill;
- CBO is charged with reporting all Appropriations that are provided to programs/agencies with an expired authorization in the EEAA

How do we do it? Manually

1. Every Public Law is skimmed to see if it might hold an Authorization of Appropriation (AoA);
2. Those bills deemed likely are flagged for the appropriate Scorekeepers;
3. Scorekeepers review the bills (mostly ctrl-F keywords, but everyone has their favorite methods) and enter or update AoAs in LCS;
4. Scorekeepers review an LCS report each year of expired authorizations and manually track down which of those received appropriations in the past year;
5. Assistant Analyst Army checks our work

CBO Hackathon

- The second year of CBO staging hackathons
- The E2A2 Project was assigned a team of six (mostly Assistant Analysts) and given one full work week to create a prototype
- Presentations of findings are given to all CBO

Project Questions

- What data format should we use? (Bill text, Xml, etc.)
  - Solution: XML
- How to handle legislation directly changing the US Code?
  - E.g. "Section 4902 of title 14, United States Code, is amended-- (1) in the matter preceding paragraph (1) by striking ``fiscal years 2020 and 2021'' and inserting ``fiscal years 2022 and 2023'';
  - Solution: Comparative Print Suite (CPS)
- AI costs for 1000+ page bills
  - Solution: regular-expression classifier
- Increased Precision
  - Chunking allows for increased AI attention

Next Steps

- Building a Prototype
- AWS Generative AI Innovation Center
- Partnering with Academics
- Participating in a Legislative Branch Community of Practice
